Friday 2nd April 2019

Dear All

ECO DAY

On Wednesday 10th April, we will be holding an Eco Day at school. We have lots of exciting and important activities planned. The children will become waste investigators for the day, conducting science experiments and making a pledge to help reduce plastic pollution. We have our master composter, Rod Weston coming in to help the children make rotbots (mini compost bins) and they will also be joining in the school spring clean, using environmentally friendly cleaning products such as lemon, baking soda and vinegar.

ALL children will need to bring a 2 litre plastic bottle and a bag of green leaves and can come to school in their PE kits on this day.

I would like some spray bottles that we can decant our home-made cleaning products into so if you have any empty cleaning product bottles that we can wash and re-use, please send these into school.

If you have any time and would like to help on this day, please let Mrs Croxton know in the office.

Kind regards

Mrs Hall
