

What's the **Summer adventure**?

The Maths Factor Summer adventure is a FREE online course aimed at helping children boost their maths confidence and be ready for September. It's ideal for helping children get back on track, accelerate their learning and advance their progress after a tricky year.

Who can use it?

All children aged 4 to 11 are welcome to join and will be able to move through activities matched to their school year and confidence level.

When does it start?

The adventure will start from the 1st July.

How does it work?

Summer adventure is a 6-week course that follows our tried-and-tested The Maths Factor approach, with Carol Vorderman's easy-to-follow video lessons and lots of practice to help your child progress.

Personalised content

On joining, we'll assess your child's confidence in specific maths topics. Content will be based on their confidence level to ensure they progress through the course at a pace that's right for them.

A little practice every day

Every week, we'll unlock 5 new sessions, so your child can work a little bit every day without feeling too pressured. After all, it's their holidays too!

Virtual rewards

Children can earn virtual golden ducks with every practice they complete. We take a positive growth-mindset approach so whatever their level, their efforts will always be rewarded.

Methodology

Each session starts with an easy-to-follow video from Carol Vorderman; then, there's some warm-up questions and a final practice to help consolidate knowledge.
